# Cartadis

eTerminal FUJIFILM

Embedded terminal specifically designed for Fujifilm equipment

This module leverages the builtin touchscreen of MFPs to enhance functionality, strengthen security, and deliver an intuitive user experience for all types of users.

Available* with : Gespage   Gespage Stratus
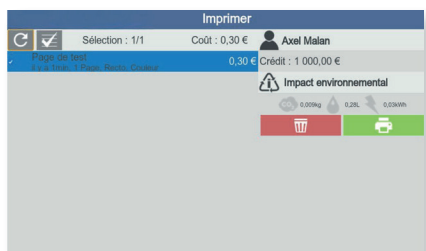

* Compatible with Fujifilm Apeos Connect

Key features

🖥 Secure user authentication: Multiple authentication methods to ensure secure and flexible access to MFPs.

⚙ Gespage Home Menu: Secure and optimized control of MFP functionalities through advanced access rights management.

🖨 Print2Me feature: Secure document printing with release on any MFP equipped with an eTerminal.

🌐 Scan2Me feature:: Send your scans by email in one click, with the user's address automatically pre-filled for faster, easier use..

📱 Gespage mobile app: Manage and release print jobs from the Gespage mobile application on smartphones (iOS / Android)..

• Secure access to MFPs

Multiple authentication methods ensure secure and flexible access, including :

- Username / ID and password
- RFID card / badge (with or without PIN code)
- Print code
- Guest access for temporary users

• Print2Me feature and print management

After authentication, the solution ensures secure and confidential printing, allowing users to retrieve their documents on any MFP equipped with an embedded terminal.

Printing is easily managed directly from the MFP: documents can be selected or deleted from the interface, and print settings adjusted (forced black and white, duplex printing, number of copies)..

• Secure access to MFPs

Ensure quick access to the main functions :

- Print, scan, and copy directly from the MFP home menu
- The Scan2Me function, available via the Fujifilm email scan menu, automatically pre-fills the user's email for fast and easy sending
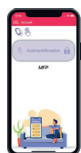

🌿 Eco-friendly printing

Gespage helps significantly reduce your carbon footprint by encouraging the adoption of best practices for smarter, more sustainable printing across your organization.
